

S Clift Building Contractors Limited

ENVIRONMENTAL POLICY

S Clift Building Contractors is an independent and expanding building contractor, completing projects to the finest standards throughout the Midland area.

The Company recognises that its activities have an impact upon the environment at local, regional and global levels and acknowledges a responsibility for the protection of the environment world wide, as well as the health, safety and welfare of its employees and the wider community.

S Clift Building Contractors are committed to:

Promoting the protection of the environment and minimising the impact of all its activities and the activities of its sub-contractors upon each of the local, regional and global environments both directly and through its influence on others who may have an effect within these areas.

Contributing to a sustainable and healthy future by conserving natural resources and by minimising avoidable waste and pollution wherever possible.

Reducing the use of fossil fuels through improvements to energy efficiency and the substitution of renewable energy sources wherever possible within its activities.

Avoiding the unnecessary use of hazardous materials and processes within all of the work tasks undertaken by the Company.

Developing effective waste management and recycling procedures and using recycled and recyclable materials wherever possible.

Increasing awareness of environmental responsibilities among staff and all of its sub-contractors employed by the Company.

Encouraging initiatives that enhance its environmental performance.

For example: BS8555 and ISO14001 Environmental Management System (EMS).

To achieve these goals S Clift Building Contractors will:

Educate and train staff in environmental matters, wherever possible, to give them a better understanding of the impact on the environment of their work activities.

Progressively reduce the amount waste generated, wherever possible within the work activities of the Company, and of those of any sub-contractors employed by the Company.

Market products, which create the minimum damage to the environment and use it's purchasing influence to promote production of such products from all of its suppliers.

Ensure that all communications with the public and other associated parties in all work activities of the Company are not misleading and unambiguous.

Respect the interests of neighboring communities and the world community as a whole.

Review our policies concerned with the conservation of the environment in an ongoing manner at regular intervals.

Work with suppliers and sub-contractors to improve their environmental performance.

Where appropriate, consult with the local community on environmental issues and the impact on the community our work activities will have.

The above is authorised by the Director of the Company and reflected throughout the Company and its employees.
